

NSBE CKY Codes!

Coding has been and is becoming an even more essential tool for the young technical professional. In partnership with Awesome Inc., NSBE CKY decided that this would be the perfect time to brush up on their coding skills. Awesome Inc. hosted a four-part coding series for the chapter. During these classes, NSBE members learned HTML and CSS. The best part about it is that none of the attendees were Computer Science Majors when in school. Website development was the focus. NSBE CKY hopes to continue this great relationship with Awesome Inc. and venture into Phone App development in the future. The lesson here is, it is never too late to gain some new skills.
