

NSBE CKY Engineering in the Park

The Central Kentucky Professional Chapter (CKY) hosted their 3rd annual Engineering in the Park event. Using simple instructions participants were able to make bubbles, silly putty, plane launchers, gum drop structures, visual holoprojections as well as demonstrate their math knowledge. CKY NSBE also received support from other engineering organizations. University of Kentucky NSBE chapter explored the dynamics of roller coasters using marbles. Society of Women engineers bought out the snap circuits. Society of Hispanic engineers launched soda rockets. Brickz4kids used legos to create marble mazes. University of Kentucky solar car team provided a demonstration on how energy can be used to power a vehicle. Once participants completed the demonstrations provided they received lunch, school supplies, and a bag full of treats!
