

The CKY Professionals participated in the 3rd Annual Youth Science Summit. This Kentucky Science Center event was hosted at Lexmark International, Inc. NSBE CKY combined chemical engineering with a love for food by teaching the participants how to make ice cream. Lexington Urban League Young Professionals (LULYP) supported this activity as well.

Ingredients included: milk, cream, vanilla flavoring, sugar, ice and of course salt.

This activity turned out to be one of the favorite stations at the event. After all, who doesn't love ice cream? After the ice cream activity concluded, some of NSBE CKY and LULYP participated alongside Delta Sigma Theta Sorority, Inc. Lexington (KY) Alumnae Chapter in a Veterinary Pathology hands-on lab. In this lab students got to watch a horse necropsy procedure and also gets up close and personal with several animal specimens.
